Profile

I'm a 23 years old front-end developer with 3+ years of experience in developing complex yet responsive and scalable web applications with React JS and working across the full-stack to deliver exceptional user experience. I enjoy working on challenging problems and finding innovative solutions.

Work Experience

Front-End Developer | [Zhaket](#), Tehran - Iran (Remote)

Aug 2021 – March 2022

The biggest market for wordpress themes and plugins in Iran with over 100,000 active users. my responsibilities in Zhaket:

- Implemented robust and performant new features for Zhaket web app using JavaScript, Next-js, Redux, Redux-saga, Ant design and Sass.
- Worked in a highly collaborative agile team of 9 members and communicated closely with designers for pixel-perfect implementation of new features and recommended solutions to create the best possible user experience.
- Improved application first load time by 42% and overall performance up to 60% by analyzing app bundles and refactoring the codebase, following clean code principles.
- Took advantage of Next.js SSR / SSG to improve applications' SEO and create a seamless and engaging user experience.
- Performed regular site maintenance and Debugged existing features and solved clients' problems.
- Implemented affiliation system from ground up (+affiliation analytics report panel for admins) which resulted in over 8,000 new users and 27% growth in sales within the first month.

Front-End Developer | [QLIndex Ltd](#), Dublin - Ireland (Remote)

April 2020 – Dec 2020

QLIndex introduces an innovative indication as a Quality of Life Index (QLI) for every postcode in Ireland. The QLIndex is based on geo-spatial data and employed multiple high resolution datasets. my responsibilities in QLIndex:

- Developed user interfaces from ground up with React JS and built a number of features for customers by web scraping
- Implemented user authentication (using JWT)
- Managed a complex application state (using Redux and Thunk)
- Displayed related data for each district of Ireland on map and various types of charts (using ECharts and chart.js)
- Designed and developed a feature-rich map system (using Leaflet)
